SUMMARY

Computer Science student aspiring to become a Full Stack Web Developer with hands-on experience in building web applications. Skilled in JavaScript, Node.js, Express.js, MongoDB, Python, React.js, HTML, and CSS. Focused on strengthening core development skills and building efficient, scalable applications. Passionate about problem-solving and creating user-friendly solutions.

PROJECT

JobNet- Academic Project

github.com/umadevi1610-bk/Jobnet • June 2025 - August 2025

- Developed a full-stack job portal using Python and Django handling **50+ user interactions**.
- Implemented skill extraction and matching system improving job relevance by **30%**.
- Designed end-to-end application flow including authentication and job application system.
- Integrated resume upload functionality with backend processing.
- Improved user flow for job application process.

Quiz App

github.com/umadevi1610-bk/quiz-app • September 2025 - November 2025

- Built an interactive quiz application supporting **100+ questions**.
- Implemented dynamic question rendering and real-time score tracking.
- Improved user experience with responsive design across **multiple devices**.
- Optimized application performance for faster question loading.
- Applied DOM manipulation techniques for interactive UI experience.

FullStack Auth

github.com/umadevi1610-bk/fullstack-auth • February 2026 - March 2026

- Developed secure authentication system handling **user login & registration workflows**.
- Implemented session management and backend validation for **data security**.
- Designed REST APIs using Node.js and Express.js.
- Integrated backend APIs with frontend for seamless authentication flow.
- Tested and debugged authentication features to ensure error-free performance.

EDUCATION

B.Sc Computer Science

Devanga Arts College, Aruppukottai • Virdhunagar,Tamil Nadu • 06/2023-05/2026

SKILLS

Python

JavaScript.

HTML

CSS

React.js(Basic)

Node.js

Express.js

MongoDB

Git

Data Analysis

EXPERIENCE

AI & Python Intern (Training Internship)

Durkkas InfoTech

May 2025 - June 2025, VirdhuNager,TamilNadu.

- Completed structured training in Python programming and AI fundamentals with hands-on implementation.
- Developed a self-driving car prototype using white line detection and computer vision techniques achieving consistent real-time tracking in test scenarios.
- Implemented card detection system for automation-based project using Python and image processing logic.

- Performed multiple testing and debugging cycles to improve system stability, accuracy, and responsiveness.
 - Improved system performance through iterative optimization and fine-tuning techniques.
 - Collaborated with team members to analyze results and improve overall project efficiency and output quality.
-
